Utah County Extension Move
Central Utah Water Conservancy District has a new neighbor!

The Utah County Extension office has moved from downtown Provo to the second floor of our building in Orem. You can now bring unknown plants, weeds, and insects right here to the second floor of our building and have them identified for a nominal fee (see details here: Diagnostics Lab).
The Extension office hours are Monday-Friday, 8:00 am - 5:00 pm

Pruning Ornamental Trees

Most of the trees in your landscape will need a little pruning throughout their life to keep them healthy and happy.
When to Prune: The best time to prune is the latter part of winter or early part of spring while the tree is still dormant and buds have not yet begun to swell. This is easier on the tree, and it makes it easier for you to see the branching patterns because there aren't any leaves. February and March are generally good times to prune.

What to Prune: It's important to prune out dead and diseased branches to help maintain tree health. Branches that are potentially hazardous to structures or people should also be removed. Crossing and crowded branches should be removed, ideally when they are small, to improve a tree's form and to prevent branches from rubbing against each other or growing into each other.

What to Use: As a general guideline, you will need three tools. The first is a set pruners for twigs and small branches. The second is a set of long-handled loppers for slightly larger branches. The third is a curved pruning saw for larger branches that loppers won't cut. If your trees are mature, then you may need a chainsaw as well. Be sure that your tools are sharp so your cuts are clean and less stressful on the tree.
Dwarf Twisted Scotch Pine

*Pinus sylvestris 'Globosa Viridis'*

This is a slow-growing Scotch pine with needles that are slightly twisted. Adds year-round interest to any landscape, and fits well in small spaces. Tolerant of poor soils and dry conditions.

**Plant Type:** Evergreen Shrub  
**Mature Size:** 8' T x 6' W  
**Light Requirements:** Full Sun  
**Hardiness Zones:** 3-7
